## HAIRDRESSER'S INSTRUMENTS

*Barber*

*We are constantly looking for opportunities to satisfy our customers.*

*We cooperate with the most famous and experienced experts in the hairdressing industry.*

*We attract the most talented and professional people to work with our Company.*

*We create our professional instruments in order to make life better.*

*Premax Hairdresser's Scissors are absolutely ergonomic – a thumb is placed easily and naturally in the intentionally curved ring hole.*

*And regular, and what is especially important, a diagonal cut comes out perfectly neat. Via the flat Vario-Plus Screw you can adjust the scissor stroke.*

*Scissor blades have a crescent shape in section; they are integrated and polished in a specific way – all this keeps them razor sharp for a long time. This effect is also ensured by the material the blades are made of – by quenching the steel is frozen deep, and that's why it is super hard.*

*Our Professional Instruments Collection will help you to bring your most bold ideas and fantasies.*

*You will be able to find instruments both for professionals, and for those who begin their career in our Product Catalogue.*

# Bohemia Crystal

## DIAMANTE

We are happy to introduce a new Collection of handmade Bohemia Crystal Files incrustated with crystals. The crystals for this Collection are cut by the Czech craftsmen using an ancient crystal cutting technology. The basic component of crystal – Rocky Quartz – is mined in the heart of Bohemia. Peculiar properties of this material keep the crystal glass clear and the variety of its natural antibacterial properties active.

## MAKE-UP ITEMS

*Make-up*

*Make-up is a mystery that has nothing to do with rush. Correct make-up is the key secret of every woman's allure. Emphasizing the merits and concealing the defects, making the skin shiny, and the eyes lambent, creating an inimitable and sensual image – visage experts have invented a lot of things to make her look dazzling. However, eyeshades, face paint, face powder, and even a lipstick can be of no use if you don't have small, but totally irreplaceable things in your hands – a Brush, a Make-Up Sponge, or an Applicator... Solinberg offers only the best quality products to its customers; it can bring your make-up to perfection and will allow you to play with color and tone. Make-up application is akin to the work of an artist creating a work of art. A thin line, some improvisation, several brush strokes... – and you are intriguingly beautiful!*

## MIRRORS

*Mirrors*

*There is a thing no woman can go without. This thing is steeped in mysteries and mystical legends. It is referred to a mirror. Its history counts on several millenniums – it is interesting to see yourself in right perspective!*

*Originating from the East it was made from pieces of polished copper and silver. Europe discovered a mirror only in 13th century. The production was very expensive; therefore, it was shrouded in mystery. Venetian manufactures were keeping the secret of its manufacture on a remote island. Baroque period revealed a great variety of mirrors of different shapes and types – from miniature pocket ones to magnificent trumeaus. This strange thing astonished and thrilled, and was obviously rejected by the Church – there was a time when having a mirror at home was officially forbidden. However, nowadays a mirror is our everyday life's companion. You will never feel lonely if you always have it with you in your purse. Of different forms, colours, and sizes. On the toilet table, in the bathroom, in the lobby, or in your coat pocket.*

*Smile – you always have an opportunity to produce a sundog!*
